Most HR pros believe their organizations well-being programs are at least reasonably effective but there's still room for improvement

say the programs that promote employee well-being are effective to a moderate degree

Just

say the programs that promote employee well-being are effective to a high or very high degree

Compared to less successful organizations**, organizations that are more successful* in implementing well-being programs are more likely to:

successfully maintain employees' well-being

be more confident that employees who work from home operate in a safe work environment that meets the standards of occupational safety and health laws

offer financial education initiatives to employees

successfully address employee stress issues

Consider these strategies

- ♥ **Focus** on mental health and well-being of employees
- ♥ **Ensure** employees are aware of the well-being benefits available to them
- ♥ **Measure** well-being initiative outcomes
- ♥ **Develop** strong communication channels
- ♥ **Plan** for the future

About the Survey

The survey, called "The State of Learner Experience, Engagement and Solutions, 2022" ran in the first quarter of 2022. There were responses from 246 participants with 185 responding to every question. The participants represent a broad cross-section of employers by industry and number of employees, ranging from small businesses with under 50 employees to enterprises with 20,000 or more employees.

***Well-being leaders:** These represent respondents who indicate that their organization's programs that promote employee well-being are effective to a high or very high degree.

****Well-being laggards:** These represent respondents who indicate that their organization's programs that promote employee well-being are effective to a low or very low degree.
